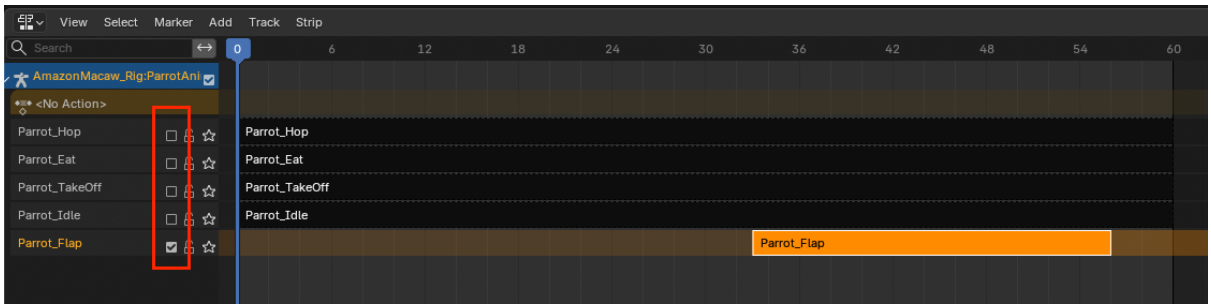
Guidelines on Blender Animation for Parrot FBX Export

During editing in blender:

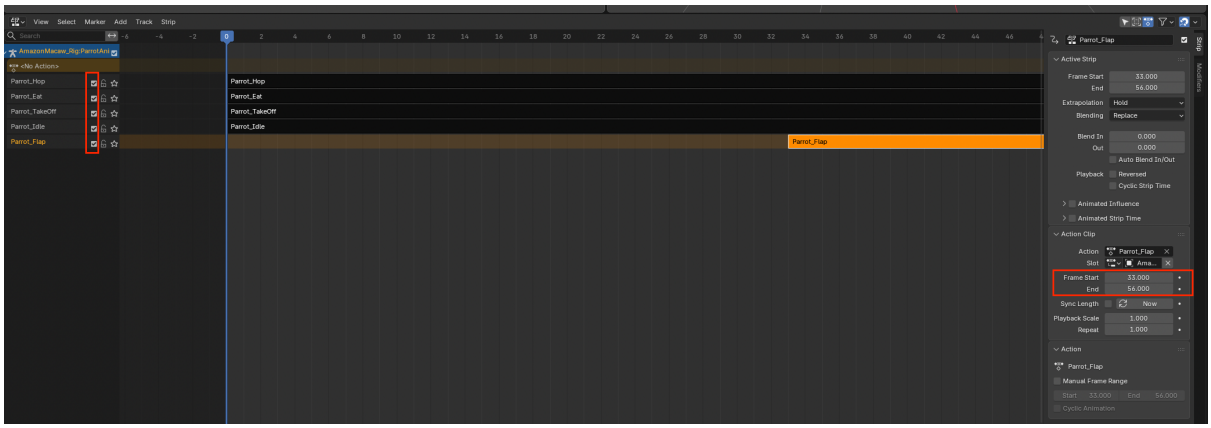
Under “Nonlinear Animation” section,



1. Toggle **OFF** other NLA strips that are not in edit, so it will not influence previews in Blender.

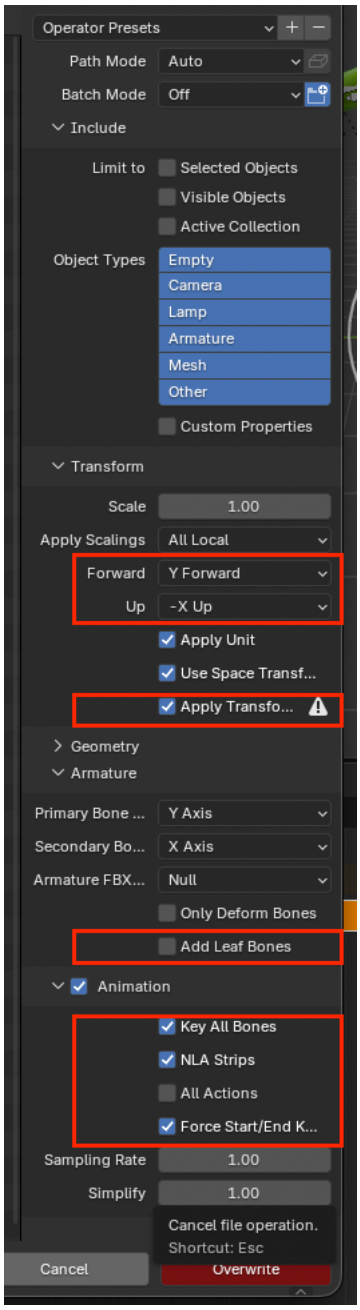
Before Export:

Under “Nonlinear Animation” section,



1. Toggle **ON** all NLA strips.
2. If need, clip NLA strip under “Action Clip” panel.

Under Export > FBX panel,



1. For this particular model, set **Y Forward** and **-X Up**.
2. Check Apply Transformation
3. Uncheck Add Leaf Bones
4. Check Key All Bones
5. Check NLA Strips
6. Uncheck All Actions
7. Check Force Start/End Key...
